

Power BI Sales Data Report

- This repository contains data and a Power BI report for analyzing sales data. The project includes:
 - **Data Files:** CSV data files within a compressed `.zip` archive.
 - **Power BI Report:** A `.pbix` file that provides static visualizations for sales data analysis.

Files in the Repository

1. data.csv.zip: A compressed file containing CSV data files used for analysis.

2. static report on sales data.pbix: The Power BI report file, which includes visualizations and insights based on the sales data.

How to Use

1. Extract the Data:

- Download and unzip `data.csv.zip` to access the CSV files.

2. Open the Power BI Report:

- Open `static report on sales data.pbix` using Power BI Desktop to view and interact with the visualizations.

Requirements

- [Power BI Desktop](https://powerbi.microsoft.com/desktop/) (latest version) to open and modify the `.pbix` report.

Overview of the Report

The Power BI report includes visualizations that cover:

- Sales trends over time
- Key performance indicators (KPIs) for sales
- Regional sales breakdown
- Product performance insights

Getting Started

1. Clone the repository:

```
git clone https://github.com/harshtiwari123/PowerBI-Projects.git
```
